Re: Complaint# OC04-012

Dear Sirs,

I had been working at 505 Kelsey Circle doing retaining wall on the 19th of August. At approximately 11am I started running the irrigation lines, to my knowledge all the flags had be marked or flags from previous markings were still in place. I was under the impression at this time, that if the flags were in place and the utilities marked, I could excavate. I have since talked to Larry Englerth(after receiving the complaint notices), and he informed me that if the utilities are marked or not, you may not dig until the 48 hour notice is up. This will be the policy at American Underground Sprinkler in the future. I do not want to go through this process again. I do understand the gravity of the situation and all excavating and locating regulations will be followed to the letter by American Underground Sprinkler.

Sincerely,

Kurt Hannasch
American Underground Sprinkler
